Role-Specific Portfolio: zohairomar.netlify.app/for/cibc/tech-operations-developer

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4**. Hands-on **Python scripting and Power BI reporting**: built a Power BI dashboard simulating natural gas asset integrity with 10+ KPIs, full data lineage, and a data dictionary; built a Python ETL pipeline with schema validation, vectorized Pandas (**35% runtime reduction**), and Azure AD/Microsoft Graph API integration. Comfortable across **Python, SQL, JavaScript/TypeScript, Java, and Microsoft Office 365** (Excel modeling, PowerPoint, SharePoint, Teams), with applied REST/HTTP/OAuth networking experience. Co-op enrolled, returning to full-time studies after the term; open to relocating to Toronto for the 4-month Fall 2026 placement.

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, Java, R, HTML, CSS, C, C++

Data & Reporting: Power BI, DAX, Power Query, Power Automate, Pandas, NumPy, statsmodels, ETL pipelines, schema validation, vectorized Pandas

Microsoft Office 365 & Collaboration: Excel (Pivot Tables, VLOOKUP, modeling), PowerPoint, Word, SharePoint, Microsoft Teams, Outlook

Networking, APIs & Security: REST APIs, HTTP, OAuth 2.0 (Azure AD), Microsoft Graph API, CORS, role-based access control (RBAC), Linux fundamentals

Software Delivery: Git, GitHub Actions, Jenkins, Docker, CI/CD, Spring Boot, Flask, React, JUnit5, pytest, Agile/Scrum

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Software Engineering, Operating Systems, Applied Machine Learning (Python), Computer Applications in Economics (Excel modeling), Data Structures & Algorithms, Statistics

Projects

Oil & Gas Asset Integrity Dashboard; Power BI, DAX, Power Query, SQL Server, SharePoint

- Built a **Power BI** reporting dashboard simulating natural gas asset integrity with **role-based views** for engineers and managers, surfacing 10+ KPIs including corrosion rate (mmpy), oil content (ppm), overdue inspections, and certification compliance.
- Maintained full **data lineage** from source systems to stakeholder reports and a **data dictionary** with standardized naming conventions; built management-level summaries with department/month/year slicing and auto-refresh simulation.

Production Analytics Pipeline; Python, Pandas, statsmodels, Power Automate, Azure AD, Microsoft Graph API

- Built a Python ETL pipeline ingesting multi-year operational data with schema validation, anomaly detection (rolling z-score), and completeness checks; refactored nested loops into **vectorized Pandas** operations, cutting runtime by **35%**.
- Integrated **Azure AD (OAuth 2.0)** and **Microsoft Graph API** for automated data flow between cloud sources and SharePoint with token refresh and scope-based error handling.

Ticket Triage RAG Bot; Python, Flask, OpenAI API, Google Gemini

- Built a Python/Flask REST service integrating OpenAI and Gemini APIs with multi-provider fallback, structured prompt engineering, caching, and **34 automated tests**.

Experience

Enactus UCalgary – WealthPath (Financial Literacy Platform) Jul 2025 – Present
Front-End Development Lead; React, TypeScript, Google Cloud MySQL, GitHub Actions Calgary, AB

- Led a 4-person Agile team through weekly sprints; built a reusable **React/TypeScript component library** and connected the frontend to a **Google Cloud MySQL** backend.
- Set up REST API documentation and coordinated with the back-end team to define API contracts; ran **30+** merges through CI/CD with code review and release management.

TechNova Feb 2025 – Present
Co-Founder & VP Technical; Microsoft Office, Teams, SharePoint, Word, PowerPoint Calgary, AB

- Co-founded a technology consulting club; built full-stack applications and dashboards for **100+ users**; ran client intake sessions and bi-weekly status updates across concurrent engagements with 4 developers reporting to me.

Agrius IT May 2024 – Jul 2024
Software Developer Intern; Python, SQL, HTML/CSS, JavaScript Abu Dhabi, UAE

- Developed and debugged **Python/SQL backend** solutions for an enterprise SaaS platform serving **1,000+ daily users**; implemented **CORS** and **RBAC**; monitored event logs and resolved three critical bottlenecks ahead of schedule.
