

# Zohair Omar

zohairomar@gmail.com | linkedin.com/in/zohairomar | github.com/zohairomar1

**Role-Specific Portfolio:** zohairomar.netlify.app/for/kinaxis/data-ingestion

## Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4**. Hands-on experience building **full-stack applications and data ingestion pipelines**: shipped a Java/PostgreSQL system with Docker-based CI/CD and 99 automated tests, built an ETL pipeline with schema validation and Microsoft Graph API integration, and led a React/TypeScript frontend connected to a Google Cloud MySQL backend. Comfortable across **Java, JavaScript/React, Python, and SQL** with object-oriented design and relational databases. Returning to school after the term; open to relocating to Ottawa for the 8 or 12-month placement.

## Technical Skills

**Languages:** Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, R, C, C++

**Frameworks & Web:** React, Next.js, Tailwind CSS, Flask, REST APIs, API documentation, full-stack SaaS development

**Data Integration & ETL:** Pandas (vectorized ops), data validation, schema checks, anomaly detection, Microsoft Graph API, Power Automate, Azure AD (OAuth 2.0)

**Databases:** PostgreSQL, MySQL (Google Cloud), SQL Server, relational schema design, OOP-style data modeling

**DevOps & Tools:** Git, GitHub Actions, Jenkins, Docker, CI/CD, Linux, automated testing (pytest, JUnit5), Agile/Scrum, code review

## Education

**Bachelor of Science, Computer Science & Mathematics (Minor in Economics)** Expected Apr 2027  
University of Calgary, Alberta

**Bachelor of Science, Computer Science** Sep 2022 – Sep 2024  
University of British Columbia, Vancouver

*Relevant Coursework:* Software Engineering, Object-Oriented Programming (UML), Data Structures & Algorithms, Applied Machine Learning (Python), Operating Systems, Statistics

## Projects

**Incident Management Platform;** Java, PostgreSQL, GitHub Actions, Jenkins, Docker

- Delivered a full-stack **Java** system with **object-oriented design**, UML class diagrams, and **relational schema design** in PostgreSQL with role-based access control.
- Shipped **99 unit and integration tests** validating every merge; built CI/CD pipelines using GitHub Actions, Jenkins, and **Docker** for containerized build, test, and deployment.
- Performed integration testing, performance tuning, and code review across feature branches; identified defects before production deployment.

**Data Ingestion & Analytics Pipeline;** Python, Pandas, statsmodels, Power Automate, Azure AD

- Built an **ETL pipeline** ingesting multi-year operational data with **schema validation**, anomaly detection, and completeness checks; refactored nested loops into **vectorized Pandas** operations, cutting runtime by **35%**.
- Integrated **Azure AD (OAuth 2.0)** and **Microsoft Graph API** for automated data flow between cloud sources and SharePoint with token refresh and scope-based error handling.

**Ticket Triage RAG Bot;** Python, Flask, OpenAI API, Google Gemini, Streamlit

- Built a full-stack Python/Flask application integrating OpenAI and Gemini APIs with structured prompt engineering, multi-provider fallback, and **34 automated tests**.

## Experience

**Enactus UCalgary – WealthPath** Jul 2025 – Present  
*Front-End Development Lead;* React, TypeScript, Google Cloud MySQL, GitHub Actions  
Calgary, AB

- Built a reusable **React/TypeScript component library** for a full-stack SaaS-style web application; set up REST API documentation and connected the React frontend to a **Google Cloud MySQL** backend.
- Led a 4-person Agile team through weekly sprints; implemented CI/CD with GitHub Actions across **30+** merges with automated testing, code review, and release management.

**TechNova** Feb 2025 – Present  
*Co-Founder & VP Technical;* Python, SQL, Git  
Calgary, AB

- Built full-stack web applications and dashboards for **100+ users**; led 4 developers through Agile sprints with code review, structured documentation, and stakeholder communication.

**Agrius IT** May 2024 – Jul 2024  
*Software Developer Intern;* Python, SQL, HTML/CSS, JavaScript  
Abu Dhabi, UAE

- Developed and debugged **Python/SQL backend** solutions for an enterprise SaaS platform serving **1,000+ daily users**; implemented CORS and RBAC; resolved three critical bottlenecks ahead of schedule.
