Role-Specific Portfolio: zohairomar.netlify.app/for/cibc/business-systems-analyst

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4**. Comfortable doing the translation work between business partners and technical teams: **co-founded TechNova** running client intake and requirements gathering across concurrent engagements, **led REST API contract coordination** between front-end and back-end teams at Enactus WealthPath, and produced SOPs and cross-functional handoff documentation at Agrius IT for an enterprise platform serving 1,000+ daily users. Strong technical depth in **UML, ERD/relational schema design, SQL, Java/Spring Boot, Python, and Power BI** for reading code reviews and architecture decisions. Co-op enrolled, returning to full-time studies after the term; open to relocating to Toronto for the 4-month Fall 2026 placement.

Technical Skills

Languages: SQL, Java, Python, JavaScript, TypeScript, R, HTML, CSS

Business Analysis: Requirements gathering, UML class diagrams, ERD/relational schema design, REST API documentation, process documentation, SOPs, data dictionary, data lineage

Microsoft Office & Collaboration: Excel (Pivot Tables, VLOOKUP, modeling), PowerPoint, Word, SharePoint, Microsoft Teams, Outlook

Data & Reporting: Power BI, DAX, Power Query, Power Automate, SQL Server, PostgreSQL, MySQL, Azure AD, Microsoft Graph API

Software Delivery: Git, GitHub Actions, Jenkins, Docker, CI/CD, Spring Boot, Flask, Agile/Scrum, sprint planning, code review

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Software Engineering, Object-Oriented Programming (UML), Computer Applications in Economics (Excel modeling), Data Structures & Algorithms, Statistics, Microeconomics

Experience

Enactus UCalgary – WealthPath (Financial Literacy Platform) Jul 2025 – Present
Front-End Development Lead; React, TypeScript, Google Cloud MySQL, GitHub Actions Calgary, AB

- Coordinated **REST API contracts** between front-end and back-end teams; documented endpoint schemas and data flows so integration alignment was settled upfront rather than during PR reviews.
- Led a 4-person Agile team through weekly sprints, sprint demos, and bi-weekly stakeholder updates to non-technical Enactus leadership; ran **30+** merges through CI/CD with code review and release management, accelerating delivery by 1–2 sprints.

TechNova Feb 2025 – Present
Co-Founder & VP Technical; Microsoft Office, Teams, SharePoint, Word, PowerPoint Calgary, AB

- Co-founded a technology consulting club; ran **client intake sessions** to gather business requirements and translated rough ideas into scoped technical plans with budgets, schedules, and milestones for concurrent client engagements.
- Delivered bi-weekly status updates and stakeholder presentations to client teams; produced Word-based handoff documentation for every project; managed 4 developers through Agile sprints with code review and structured documentation, building full-stack apps and dashboards for **100+ users**.

Agrius IT May 2024 – Jul 2024
Software Developer Intern; Python, SQL, Outlook, Microsoft Teams, Excel Abu Dhabi, UAE

- Produced **SOPs, process documentation, and Excel inventory trackers** for a v-ERP platform serving **1,000+ daily users**; coordinated with operations, business, and engineering teams via Outlook and Microsoft Teams.
- Investigated and resolved three critical bottlenecks ahead of schedule in the Python/SQL backend; monitored event logs and triaged incidents.

Projects

Oil & Gas Asset Integrity Dashboard; Power BI, DAX, Power Query, SQL Server, SharePoint

- Built a Power BI reporting dashboard simulating natural gas asset integrity monitoring with **role-based views** for engineers and managers, surfacing 10+ KPIs including corrosion rate (mmpy), oil content (ppm), overdue inspections, and certification compliance.
- Maintained full **data lineage** from source systems to stakeholder reports and a **data dictionary** with standardized naming conventions across the data model; built management-level summaries with department/month/year slicing.

Incident Management Platform; Java, Spring Boot, PostgreSQL, GitHub Actions, Jenkins, Docker

- Scoped requirements and designed a full-stack **Java/Spring Boot REST API** for ticket, incident, and release workflows; produced UML class diagrams, ERD-based PostgreSQL schema with role-based access control, and **99 unit and integration tests** validated through GitHub Actions, Jenkins, and Docker CI/CD.
