Role-Specific Portfolio: zohairomar.netlify.app/for/atco/customer-connections

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4; Class 5 Driver's License (Alberta); enrolled in Co-op**, available for the **full 16-month term** starting September 2026 (12-month option also works). **Applying for the September 2026 Co-op Term.** Hands-on with the work this role calls for: built a Power BI dashboard simulating natural gas asset integrity with role-based reporting and a data dictionary across the data model; co-founded TechNova running process improvements, scope/budget/schedule planning, and bi-weekly stakeholder documentation across concurrent engagements; produced SOPs and Excel inventory trackers at Agrius IT for an enterprise platform serving 1,000+ daily users. Based in Calgary, ready to relocate to Edmonton with the relocation assistance offered.

Technical Skills

Reporting & Analytics: Power BI, DAX, Power Query, Power Automate, Excel (Pivot Tables, VLOOKUP, modeling), SQL Server, role-based reporting views, KPI dashboards

Documentation & Process: SOPs, process documentation, business case development, requirements gathering, scope/budget/schedule planning, data dictionary, data lineage, REST API documentation

Microsoft Office & Collaboration: Excel, PowerPoint, Word, SharePoint, Microsoft Teams, Outlook

IT & Security (Applied): Role-based access control (RBAC), OAuth 2.0 (Azure AD), Microsoft Graph API, CORS, event log monitoring, incident triage

Languages & Tools: SQL, Python, JavaScript, TypeScript, Java, R, Git, GitHub Actions, Jenkins, Docker, Agile/Scrum

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Software Engineering, Object-Oriented Programming (UML), Computer Applications in Economics (Excel modeling), Data Structures & Algorithms, Statistics, Microeconomics

Experience

TechNova Feb 2025 – Present

Co-Founder & VP Technical; Microsoft Office, Teams, SharePoint, Word, PowerPoint, Excel Calgary, AB

- Co-founded a technology consulting club from scratch; ran client intake sessions to source process improvement opportunities at student organizations and turned rough ideas into **scoped plans with budgets, schedules, and milestones**.
- Led **documentation development** for every engagement: Word-based handoff documents, bi-weekly stakeholder presentations, and project-tracking spreadsheets across concurrent client engagements with 4 developers reporting to me.
- Built full-stack web applications and reporting dashboards used by **100+ users** on the client side.

Enactus UCalgary – WealthPath Jul 2025 – Present

Front-End Development Lead; React, TypeScript, Google Cloud MySQL, GitHub Actions Calgary, AB

- Set up **REST API documentation** and coordinated with the back-end team to define API contracts across cross-functional development; led a 4-person Agile team through weekly sprints and bi-weekly stakeholder updates.
- Ran **30+** merges through CI/CD with code review and release management; documented endpoint schemas for cross-team integration.

Agrius IT May 2024 – Jul 2024

Software Developer Intern; Python, SQL, Outlook, Microsoft Teams, Excel Abu Dhabi, UAE

- Produced **SOPs, process documentation, and Excel inventory trackers** for a v-ERP platform serving **1,000+ daily users**; coordinated with operations, business, and engineering teams; monitored event logs and triaged incidents.
- Implemented **RBAC and CORS** security controls in the backend; resolved three critical bottlenecks ahead of schedule.

Projects

Oil & Gas Asset Integrity Dashboard; Power BI, DAX, Power Query, SQL Server, SharePoint

- Built a **Power BI** reporting dashboard simulating natural gas asset integrity monitoring with **role-based views** for engineers and managers, surfacing 10+ KPIs including corrosion rate (mmpy), oil content (ppm), overdue inspections, and certification compliance.
- Maintained full **data lineage** from source systems to stakeholder reports and a **data dictionary** with standardized naming conventions across the data model.

Incident Management Platform; Java, Spring Boot, PostgreSQL, GitHub Actions, Jenkins, Docker

- Scoped requirements and designed a full-stack ticket, incident, and release management system with UML class diagrams, ERD-based PostgreSQL schema, role-based access control, and 99 automated tests through CI/CD.
