Role-Specific Portfolio: zohairomar.netlify.app/for/cibc/software-developer

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4**. Hands-on **full-stack Java/Spring Boot and application development**: shipped a Java/Spring Boot/PostgreSQL system with Docker-based CI/CD and 99 automated tests, built a Python/Flask service integrating multiple cloud APIs, and led a React/TypeScript frontend connected to a Google Cloud MySQL backend with REST API documentation. Comfortable across **Java, Python, JavaScript/TypeScript, SQL, and C/C++** with OOP design and relational databases. Co-op enrolled and returning to full-time studies after the term; open to relocating to Toronto; **prefer the 12-month term** for long-term growth on a banking technology team.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C, C++, HTML, CSS, R

Backend & APIs: REST API design and documentation, Spring Boot, Flask, OAuth 2.0, role-based access control (RBAC), CORS, JUnit5, pytest

Frontend & Full-Stack: React, Next.js, Tailwind CSS, full-stack SaaS development, component library design

Cloud & Integration: Google Cloud (Cloud SQL/MySQL), Azure AD (OAuth 2.0), Microsoft Graph API, Power Automate

DevOps & Tools: Git, GitHub Actions, Jenkins, Docker, CI/CD, Linux, Agile/Scrum, code review, integration testing

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Software Engineering, Object-Oriented Programming (UML), Data Structures & Algorithms, Operating Systems, Applied Machine Learning (Python), Statistics, Functional Programming

Projects

Incident Management Platform; Java, **Spring Boot**, PostgreSQL, GitHub Actions, Jenkins, Docker

- Delivered a full-stack **Java/Spring Boot REST API** backend with **object-oriented design**, UML class diagrams, and **relational schema design** in PostgreSQL with role-based access control across cross-functional ticket, incident, and release workflows.
- Shipped **99 unit and integration tests** validating every merge; built CI/CD pipelines using GitHub Actions, Jenkins, and **Docker** for containerized build, test, and deployment of a multi-platform system.
- Performed integration testing, debugging, and code review across feature branches; identified defects before production deployment.

Production Analytics Pipeline; Python, Pandas, statsmodels, Power Automate, Azure AD, Microsoft Graph API

- Built a Python data pipeline ingesting multi-year operational data with schema validation, anomaly detection, and completeness checks; refactored nested loops into **vectorized Pandas** operations, cutting runtime by **35%**.
- Integrated **Azure AD (OAuth 2.0)** and **Microsoft Graph API** for automated data flow between cloud sources and SharePoint with token refresh and scope-based error handling.

Ticket Triage RAG Bot; Python, Flask, OpenAI API, Google Gemini

- Built a Python/**Flask** REST service integrating OpenAI and Gemini APIs with structured prompt engineering, multi-provider fallback, caching, and **34 automated tests**.

Experience

Enactus UCalgary – WealthPath (Financial Literacy Platform) Jul 2025 – Present
Front-End Development Lead; React, TypeScript, Google Cloud MySQL, GitHub Actions Calgary, AB

- Led a 4-person Agile team through weekly sprints; built a reusable **React/TypeScript component library** and connected the frontend to a **Google Cloud MySQL** backend.
- Set up REST API documentation and coordinated with the back-end team to define **API contracts** and ensure integration alignment across cross-functional, multi-platform development.
- Implemented CI/CD with GitHub Actions across **30+** merges with automated testing, code review, and release management; accelerated delivery by 1–2 sprints.

TechNova Feb 2025 – Present
Co-Founder & VP Technical; Python, SQL, Git Calgary, AB

- Built full-stack web applications and dashboards for **100+ users**; led 4 developers through Agile sprints with code review, structured documentation, and stakeholder communication.

Agrius IT May 2024 – Jul 2024
Software Developer Intern; Python, SQL, HTML/CSS, JavaScript Abu Dhabi, UAE

- Developed and debugged **Python/SQL backend** solutions for an enterprise SaaS platform serving **1,000+ daily users**; implemented CORS and RBAC; resolved three critical bottlenecks ahead of schedule.
