Role-Specific Portfolio: zohairomar.netlify.app/for/bmo/software-developer

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4**. Hands-on **full-stack Java/Spring Boot** and **test-driven development**: shipped a Java/Spring Boot REST API with PostgreSQL, role-based access control, and **99 unit and integration tests** validating every merge through a Docker-based CI/CD pipeline; built a Python/Flask service with **34 automated tests** and multi-provider fallback; led a React/TypeScript frontend on a Financial Literacy SaaS platform with documented REST API contracts coordinated across teams. Comfortable across **Java, Python, JavaScript/TypeScript, SQL, and C/C++**; active personal investor with practical interest in banking technology. Co-op enrolled, returning to full-time studies after the term; open to relocating to Toronto for the **8-month Fall 2026 placement**.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C, C++, R, HTML, CSS

Backend & Microservices: Spring Boot, REST API design and documentation, Flask, OAuth 2.0, role-based access control (RBAC), CORS, JUnit5, pytest

Test-Driven Development & QA: TDD workflow, unit + integration testing, code review, integration testing, regression testing, automated CI test gates (JUnit5, pytest, GitHub Actions)

Applications Integration & Cloud: REST API contracts, OAuth 2.0 (Azure AD), Microsoft Graph API, Google Cloud (Cloud SQL/MySQL), Power Automate

DevOps & SDLC: Git, GitHub Actions, Jenkins, Docker, CI/CD, release management, version control, Agile/Scrum, sprint planning, Linux

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Software Engineering, Object-Oriented Programming (UML), Data Structures & Algorithms, Applied Machine Learning (Python), Operating Systems, Statistics, Microeconomics

Projects

Incident Management Platform; Java, **Spring Boot**, PostgreSQL, GitHub Actions, Jenkins, Docker

- Delivered a full-stack **Java/Spring Boot REST API** backend with **object-oriented design**, UML class diagrams, ERD-based PostgreSQL schema, and role-based access control across ticket, incident, and release workflows.
- Shipped **99 unit and integration tests** validating every merge with a TDD-style workflow; built CI/CD pipelines using GitHub Actions, Jenkins, and **Docker** for containerized build, test, and deployment.
- Performed integration testing, debugging, and code review across feature branches; identified defects and security/logging adherence gaps before production deployment.

Data Ingestion & Forecasting Pipeline; Python, Pandas, statsmodels, Power Automate, Azure AD, Microsoft Graph API

- Built a Python ETL pipeline with schema validation, anomaly detection (rolling z-score), and **ETS forecasting with rolling-origin backtesting** benchmarked against a seasonal naive baseline using MAE, RMSE, MAPE, and WAPE.
- Integrated **Azure AD (OAuth 2.0)** and **Microsoft Graph API** for cloud auth and SharePoint file movement; refactored nested loops into vectorized Pandas, cutting runtime by **35%**.

Ticket Triage RAG Bot; Python, Flask, OpenAI API, Google Gemini

- Built a Python/Flask REST service integrating OpenAI and Gemini APIs with multi-provider fallback, structured prompt engineering, caching, and **34 automated tests**.

Experience

Enactus UCalgary – WealthPath (Financial Literacy Platform) Jul 2025 – Present
Front-End Development Lead; React, TypeScript, Google Cloud MySQL, GitHub Actions Calgary, AB

- Led a 4-person Agile team building a financial literacy SaaS platform; built a reusable React/TypeScript component library and connected the frontend to a Google Cloud MySQL backend.
- Coordinated REST API contracts with the back-end team and ran **30+** merges through CI/CD with code review and release management; documented endpoint schemas for cross-team integration.

TechNova Feb 2025 – Present
Co-Founder & VP Technical; Python, SQL, Git Calgary, AB

- Co-founded a technology consulting club; built full-stack web applications and dashboards for **100+ users**; managed 4 developers through Agile sprints across concurrent client engagements.

Agrius IT May 2024 – Jul 2024
Software Developer Intern; Python, SQL, HTML/CSS, JavaScript Abu Dhabi, UAE

- Developed and debugged **Python/SQL backend** solutions for an enterprise SaaS platform serving **1,000+ daily users**; implemented CORS and RBAC; resolved three critical bottlenecks ahead of schedule.
