Role-Specific Portfolio: zohairomar.netlify.app/for/atco-gas/engineering-coop

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4**. Hands-on experience across **data analysis, process improvements, and project management** for energy and operational data: built a Power BI dashboard simulating natural gas infrastructure monitoring, designed Power Automate workflows for automated reporting, and co-founded a technology consulting club managing concurrent client engagements. **Top 3 work scope preferences: 1) Data Analysis, 2) Process Improvements, 3) Project Management**. Open to Calgary or Edmonton placements (8, 12, or 16 months) starting September 2026. Valid Class 5 Driver's License – Alberta. Enrolled in Co-op at the University of Calgary.

Technical Skills

Data Analysis & Visualization: Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP, modeling), Python (Pandas, NumPy, statsmodels), R (tidyverse)

Process & Automation: Microsoft Power Automate, Power Apps (foundational), SharePoint, Microsoft Graph API, Azure AD (OAuth 2.0), workflow design

Project Management: Agile sprints, requirements gathering, stakeholder communication, scope and schedule tracking, status reporting, documentation

Programming & Databases: Python, SQL, Java, JavaScript, HTML/CSS, C, SQL Server, PostgreSQL, MySQL (Google Cloud)

Microsoft Office: Word, Excel, PowerPoint, Outlook, Teams, SharePoint (used daily across all engagements)

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Applied Machine Learning (Python), Introduction to Data Science (R), Statistics, Software Engineering, Computer Applications in Economics (Excel modeling), Microeconomics, Macroeconomics

Experience

TechNova Feb 2025 – Present
Calgary, AB

Co-Founder & VP Technical; Python, SQL, Power BI, Power Automate

- **Co-founded** a technology consulting club from scratch (entrepreneurial spirit, ambitious vision); managed 4 developers across **concurrent client engagements** while balancing academic coursework.
- Ran **client intake sessions** to gather business requirements; translated rough ideas into scoped technical plans with budgets, schedules, and milestone tracking; led **process improvement** initiatives for client reporting workflows.
- Delivered **bi-weekly status updates**, stakeholder presentations (PowerPoint), and Word-based handoff documentation; coordinated with non-technical stakeholders to align expectations.

Enactus UCalgary – WealthPath Jul 2025 – Present
Calgary, AB

Front-End Development Lead; React, TypeScript, GitHub Actions

- Led a **4-person Agile team** through weekly sprints; tracked scope, schedule, and deliverables; ran weekly meetings with action items and status reporting to Enactus leadership.
- Coordinated cross-functionally with the back-end team to define API contracts and ensure integration alignment; used Microsoft Teams, SharePoint, and Word for sprint documentation.

Agrius IT May 2024 – Jul 2024
Abu Dhabi, UAE

Software Developer Intern; Python, SQL, HTML/CSS, JavaScript

- Investigated and analyzed **operational data** on an enterprise platform serving **1,000+ daily users**; identified and resolved three critical bottlenecks ahead of schedule.
- Produced **SOPs and process documentation**; coordinated cross-functionally with operations, business, and engineering teams via Outlook and Teams.

Projects

Oil & Gas Asset Integrity Dashboard; Power BI, DAX, Power Query, SQL Server, SharePoint

- Built a **Power BI dashboard** simulating asset integrity monitoring for **natural gas infrastructure** across 24 months of simulated operational data; visualized 10+ KPIs including corrosion rate (mmpy), oil content (ppm), overdue inspections, and certification compliance.
- Designed role-based views for engineers and managers with SRB level indicators and inspection backlog alerts; documented **business logic, assumptions, and data lineage** for stakeholder reporting.

Production Analytics Pipeline; Python, Pandas, Power Automate, Azure AD

- Built an analytics pipeline on multi-year well production data (7 wells, 2008–2016) with **Power Automate** workflows for scheduled reporting; integrated Azure AD and Microsoft Graph API for automated SharePoint file I/O.
- Refactored data processing into **vectorized Pandas operations**, reducing pipeline runtime by 35%; built statistical forecasting and validation with error metrics (MAE, RMSE, MAPE, WAPE).
