Role-Specific Portfolio: zohairomar.netlify.app/for/deloitte/wonder-analyst

Summary

4th Year Computer Science & Mathematics student @ UofC (transferred from UBC) with a Minor in Economics; **GPA: 3.4. Co-founded TechNova from scratch** (Feb 2025) and scaled it from zero to a 4-developer operation running concurrent client engagements; direct experience taking ideas from rough concept to scoped delivery (client intake, business case development, scope/budget/schedule planning). Hands-on with **emerging technologies** (RAG/LLM integration, OpenAI and Gemini APIs, full-stack AI applications) and the financial foundation from the Economics minor and Mathematics major. Based in Calgary; open to the Calgary, Toronto, or Vancouver office for the Fall 2026 placement.

Technical Skills

Business & Strategy: Co-founding & idea-to-execution, client intake, business case development, scope/budget/schedule planning, stakeholder reporting, requirements gathering, concurrent engagement management

Financial & Quantitative: Excel (Pivot Tables, VLOOKUP, modeling), microeconomics, macroeconomics, statistics, personal investing, financial literacy product design

Microsoft Office: Excel, PowerPoint, Word, SharePoint, Microsoft Teams, Outlook

Emerging Technologies: OpenAI API, Google Gemini, RAG systems, prompt engineering, full-stack AI applications, Python, JavaScript/TypeScript, React

Software & Data: Java, Spring Boot, Python (Pandas, statsmodels), SQL, Power BI, REST API design, CI/CD, Agile/Scrum, Git

Education

Bachelor of Science, Computer Science & Mathematics (Minor in Economics) Expected Apr 2027
University of Calgary, Alberta

Bachelor of Science, Computer Science Sep 2022 – Sep 2024
University of British Columbia, Vancouver

Relevant Coursework: Microeconomics, Macroeconomics, Computer Applications in Economics (Excel modeling), Statistics, Software Engineering, Applied Machine Learning (Python), Data Structures & Algorithms

Experience

TechNova Feb 2025 – Present
Co-Founder & VP Technical; Microsoft Office, Teams, SharePoint, Word, PowerPoint, Excel Calgary, AB

- **Co-founded a student technology consulting club from scratch**; built the operating model, ran the first client intake sessions to source problems student organizations were trying to solve, and validated which ideas were worth a real engagement.
- Translated rough concepts into scoped technical plans with budgets, schedules, and milestones; delivered bi-weekly status updates to client teams and produced Word-based handoff documentation for every project.
- Scaled the team to **4 developers** across concurrent client engagements; built full-stack web applications and dashboards used by **100+ users**.

Enactus UCalgary – WealthPath (Financial Literacy Platform) Jul 2025 – Present
Front-End Development Lead; React, TypeScript, Google Cloud MySQL, GitHub Actions Calgary, AB

- Led a 4-person Agile team building a **financial literacy SaaS platform** aimed at young adults; consumer-side fintech product covering personal budgeting, savings, and investing concepts.
- Coordinated REST API contracts with the back-end team and ran **30+** merges through CI/CD with code review and release management.

Agrius IT May 2024 – Jul 2024
Software Developer Intern; Python, SQL, HTML/CSS, JavaScript Abu Dhabi, UAE

- Developed and debugged **Python/SQL backend** solutions for an enterprise SaaS platform serving **1,000+ daily users**; coordinated with operations, business, and engineering teams; resolved three critical bottlenecks ahead of schedule.

Projects

Ticket Triage RAG Bot; Python, Flask, OpenAI API, Google Gemini

- Built a Python/Flask REST service integrating OpenAI and Gemini APIs with multi-provider fallback, structured prompt engineering, caching, and **34 automated tests**; emerging-tech prototype demonstrating RAG/LLM integration patterns.

Oil & Gas Asset Integrity Dashboard; Power BI, DAX, Power Query, SQL Server

- Built a Power BI reporting dashboard simulating natural gas asset integrity with role-based views, 10+ KPIs, full data lineage, and a data dictionary across the data model.

Deloitte Canada

Wonder by Deloitte

Toronto, Ontario

Re: Analyst, Wonder by Deloitte – Fall 2026 Co-op

Dear Hiring Team,

I'm applying for the Analyst role with Wonder by Deloitte for the Fall 2026 placement. I'm in my 4th year of Computer Science and Mathematics at the University of Calgary (Minor in Economics, GPA 3.4), currently enrolled in the Co-op program, and returning to full-time studies after the term.

I also put together a portfolio page for this application:

zohairomar.netlify.app/for/deloitte/wonder-analyst.

I co-founded TechNova in February 2025. We started with no clients, no developers, and no playbook. The first six months were almost entirely the work the Wonder JD describes for Analysts: sourcing problems student organizations were trying to solve with technology, validating whether each problem was worth a real engagement, and turning rough concepts into scoped plans with budgets, schedules, and milestones. Today the club runs concurrent client engagements with 4 developers reporting to me. The job became less about coding and more about deciding which ideas were worth building. What might be unusual about my path is the combination: founder operating experience plus the technical depth to prototype an MVP when an idea needs one to validate.

On emerging technologies: my most recent personal project is a Ticket Triage RAG Bot, a Python/Flask service integrating OpenAI and Gemini with multi-provider fallback and structured prompt engineering. RAG and LLM integration are where I've been spending most of my technical time outside class, because that's where I see the actual disruptive product surface area opening up right now. At Enactus WealthPath I lead a 4-person team building a financial literacy SaaS platform for young adults: consumer-side fintech, where the questions about onboarding, retention, and product-market fit are the same ones a Wonder Founder team would be working through.

On the financial side: the Economics minor covered microeconomics, macroeconomics, and the foundations of pricing and markets; Computer Applications in Economics gave me Excel modeling reps for cost-benefit analysis. I'm an active personal investor and follow the early-stage tech and venture space closely. Formal market sizing and TAM/SAM/SOM work at scale is the area I'd lean on the Wonder team and in-house playbook for in the first weeks.

Mapping to the qualifications:

- **Founder experience:** Co-founded TechNova from scratch (Feb 2025); scaled from zero to 4 developers across concurrent client engagements; ran intake, validation, scoping, and stakeholder reporting end-to-end.
- **Emerging technologies:** Ticket Triage RAG Bot (OpenAI + Gemini multi-provider integration with caching and 34 automated tests); Java/Spring Boot REST API with 99 tests on the Incident Management Platform.
- **Self-starter in fast-paced environments:** TechNova client intake and bi-weekly status updates across concurrent engagements; resolved three critical bottlenecks ahead of schedule at Agrius IT in Abu Dhabi.
- **Financial & quantitative foundation:** Economics minor (Microeconomics, Macroeconomics); Excel modeling from Computer Applications in Economics; active personal investing.

I'm based in Calgary and would prefer the Calgary office, though Toronto or Vancouver work equally well for the Fall 2026 placement.
